

All rules updated 06/06/2019

Please respect and adhere to all rules as spot checks will be exercised on the banks.

The Greenwood Fishery complex cannot accept any responsibility for any loss, damage or injury to any person, property or vehicles whilst at the Fishery.

All anglers must have a valid EA Rod Licence from the Environment Agency.

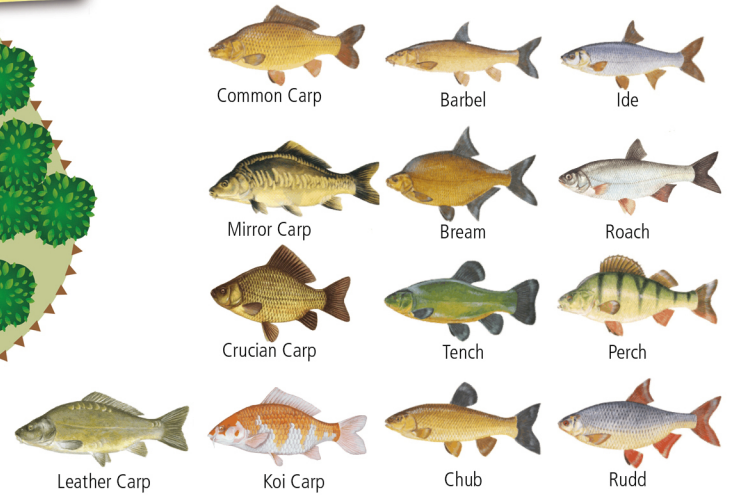

**TOP TIP**

Don't forget your rod license!

Environment Agency

*Species of fish you can expect to catch...*

**Lagoon Lake**

The main feature of this smaller lake is the island which is reachable from 6 of the 18 well-spaced pegs. Every peg on this lake will 'keep your float going under all day' with a real mixed bag of fish such as carp, barbel, bream, chub, golden ore, roach, rudd and tench. This lake suits pleasure and match anglers who enjoy using pole tactics. This lake can be booked throughout the year for club match anglers – please text us to enquire about availability.

**Kingfisher Lake**

This lake is the main lake of the complex. It has 32 pegs spaced around the lake to give more than enough space for pleasure and specimen anglers alike. Many of the pegs have enough space for bivvies along with the option of four rentable wooden fishing cabins available for anglers situated just behind their pegs. There is also the option for disabled anglers to fish from the jetty.
